

INTERNATIONAL UNIVERSITY OF HEALTH AND WELFARE

SCHOOL OF MEDICINE

GUIDE BOOK 2019

**INTERNATIONAL
UNIVERSITY OF
HEALTH AND WELFARE**

MESSAGE from the Chairman

Kuninori Takagi

M.D., Ph.D.
IUHW Chairman

The International University of Health and Welfare (IUHW) was founded in 1995 as the first comprehensive university of health and welfare in Japan, with the objective of developing health and welfare specialists and raising their status. We are now a university with around 8,300 students in 10 schools and 24 departments, as well as a graduate school, across 6 campuses, including the Tokyo Akasaka Campus established in April this year. The other campuses are located in Ohtawara City in Tochigi Prefecture, Narita City in Chiba Prefecture, Odawara City in Kanagawa Prefecture, and Fukuoka City and Okawa City in Fukuoka Prefecture.

The School of Medicine established at Narita Campus in April last year has welcomed its second year, and this academic year once again 140 students have enrolled, including 20 international students.

In the first and second year, IUHW School of Medicine offers a thorough language education and conducts a great majority of classes in English to ensure that our students have high-level English-language communication skills. In addition, students carry out up to 90 weeks of clinical training, surpassing the international standard, with compulsory overseas training based in one or more of the 41 overseas schools and institutions with which we have academic exchange agreements in the sixth year. This spring, the School of Medicine's phase II building, the WA Building, was completed. Together with the phase I building, the WB Building, we maintain one of the world's largest simulation centers, measuring 5,300 m². In this latest well-equipped learning environment, we are providing innovative medical education, engaging in the training of doctors who have comprehensive abilities in medical practice, and who can play an active role both inside and outside of Japan.

At IUHW, we carry out active learning, and group learning with small numbers of people. International students and Japanese students often engage in lively discussions in active learning. In group learning, the students are split into 20 groups of 7 people, each of which always has one international student who naturally integrates with the Japanese students.

The 20 international students include many whose grades are among the top of their class who have received a recommendation from their government or a leading medical university in their country, mainly in Asia. They are accepted on a full scholarship that covers living expenses. We anticipate that those international students who have been nurtured at IUHW will become human resources playing active roles as leaders of medicine in their home countries.

Graduate School of Medicine and Graduate School of Public Health were newly established in April this year. In these graduate schools also, excellent international students recommended by foreign governments or our partner schools have been accepted. In collaboration with School of Medicine, we are fostering personnel in fields such as international infectious diseases, remote image diagnosis, and global health, aiming to become a cutting-edge research and educational center.

We hope that many students from overseas will continue to jump at the opportunity to study at the School of Medicine at our richly international university.

MESSAGE from the President

Kuni Ohtomo

M.D., Ph.D.
President

IUHW was established in 1995 in Ohtawara City in Tochigi Prefecture, with the founding principle of "building a society with mutual respect and support." Our "Interprofessional Education," which takes advantage of our strength as a comprehensive university of health and welfare, is our greatest feature. In the five attached hospitals and numerous clinical research centers for medicine that we have established with an emphasis on clinical training, students learn about the ideal of "team care medicine" in which specialists in different fields combine their efforts and work together. Based on this ideal, our graduates play active roles in the medical and healthcare fields throughout Japan, and we have therefore earned a strong reputation.

With this as a basis, our School of Medicine was opened in April 2017 on Narita Campus. Through our innovative medical education, we foster doctors with excellent diagnostic abilities and international perspectives, who can contribute to team care medicine. Of the 140 enrolment capacity, 20 are taken by international students, mainly from Southeast Asia. Our university is the first in Japan to accept this many international students. For Japanese students, studying for six years with students from countries with different cultures, societal backgrounds, and healthcare information offers a unique opportunity for Japanese students to take in different values and naturally develop a flexible international awareness. The average marks of first semester students at the School of Medicine who took the TOEFL ITP in January 2018 surpassed the CEFR B2 level necessary to study in a university in an Anglophone country, demonstrating the effectiveness of our education.

We have established the Office of Medical Education with 25 full-time staff in the School of Medicine, in order to steadily implement our innovative curriculum. This will give us a detailed grasp of each student's understanding of the classes and practical achievements, and give appropriate and effective guidance. The number of full-time staff responsible for medical education in our School of Medicine is unprecedented within Japan, and we have provided a solid system for supporting our students.

From April 2018, an additional school building opened, where our simulation center, connected to the existing building through corridors, has a total floor area of 5,338 m². It is the largest of its kind in Japan, and one of the largest in the world. In addition, the fifth floor of the new building has been made into a graduate school area, and the newly established (April 2018) Doctoral Program in Medicine and Master's Program in Public Health of the IUHW Graduate School will foster high-level specialists in cooperation with Tokyo Akasaka Campus.

Thanks to the establishment of the School of Medicine and the Graduate School of Medicine at IUHW, we have completed our "IUHW-style team medical care," meaning every professional provides safe and secure personalized medical care at every stage, from admittance to hospital to discharge. I am very much looking forward to being able to meet many of you who are aiming to become doctors that can play an active role in the international and local communities at our unprecedented new School of Medicine.

Profile

Graduated from the University of Tokyo, School of Medicine.

Studied at Washington State University and University of Pittsburg. Honorary Professor at the University of Tokyo.

Former Professor of Radiology, Medical Science Graduate Program, the University of Tokyo Graduate School.

Specialty: Diagnostic imaging of CT, Magnetic Resonance Imaging and Interventional Radiology.

Member of: Japan Radiological Society (Chief Director 2005-2010), Japanese Society for Magnetic Resonance in Medicine (Director), Radiological Society of North America, American Roentgen Ray Society.

IUHW Campus Locations

IUHW was founded in 1995 as the first comprehensive university of health and welfare in Japan. In the academic year 2018, approximately 8,300 students are studying at the 10 schools and 24 departments in 6 campuses located in Ohtawara City (Tochigi Prefecture), Narita City (Chiba Prefecture), Minato City (Tokyo), Odawara City (Kanagawa Prefecture), Fukuoka City and Okawa City (Fukuoka Prefecture).

Features of IUHW School of Medicine

The School of Medicine has the following features for the purpose of conducting a model program of globalized medical education and fostering human resources that are equipped with comprehensive advanced treatment skills.

1

Fostering international medical professionals with an enrolment capacity of 140 students each academic year

- With an emphasis on the aspiration to contribute to international medical cooperation and community medicine, students are selected through interviews and other screening methods with enough time spent on the process.
- Of the 140 students, 20 are international students from around the world. IUHW is preparing scholarship programs as well as fee reduction or exemption measures for international students who have shown outstanding academic performance.

2

High quality medical education full of international features, which surpasses the global standard set by WFME (World Federation for Medical Education)

- Students participate in “clinical clerkships” in which they can learn as a member of a clinical team for at least two years.
- One of the world’s largest medical education simulation centers with a site area of over 5,300m² is located on campus.
- In the academic year 6, all students have the opportunity to participate in clinical training abroad for at least 4 weeks. They take “International Medicine and Health Class” to learn the medical services and health care systems in other countries.
- Intensive language education such as the introduction of lectures in English for a number of modules is offered in order to develop the ability to diagnose, participate in conferences, and have discussions in English.

3

Teaching staff are internationally-renowned leading experts in each field

- IUHW has employed many foreign teaching staff who are appropriate for this university as an international medical hub.
- Many Japanese teaching staff who have both practical and academic experiences abroad have also been recruited.

4

Advanced medical education at the graduate level

- In April 2018, Graduate School of Medicine (Doctoral Program) and Graduate School of Public Health (Master’s Program) opened to foster competent personnel capable of further developing medical sciences through collaboration with the IUHW School of Medicine.

5

The tuition is set to be at the lowest standard among other private medical schools, and a variety of scholarship programs and systems are provided

- The amount of money to be paid for six years including the tuition is set to be at the lowest among other private medical schools in Japan.
- IUHW is preparing to offer a variety of financial support programs including a special scholarship program, IUHW’s own scholarship programs, and others.

Overview of the School of Medicine Building

School of Medicine is located right next to the building of School of Nursing at Narita / School of Health Sciences at Narita, and consists of two buildings, Building WA (11 stories in height) and Building WB (6 stories in height). Its total floor area is approximately 48,000m². In the buildings, there are distinctive facilities such as four theater rooms which can hold 162 people each, and a multimedia laboratory with virtual slide system.

RF	Elevator machine room / Staircase	
11F	International conference room / Reception room / Boardroom / Restaurant	
10F	Laboratory / Joint laboratory	
9F	Laboratory / Joint laboratory	
8F	Experimental laboratory / Joint experimental laboratory	
7F	Experimental laboratory / International Telemedicine Center / Advanced Reproductive Medicine Research Center	Staircase
6F	Lecture room / Practice room	Laboratory / Joint laboratory / Teaching staff room
5F	The Center for International Research of Infectious Diseases / Graduate School of Medicine / Graduate School of Public Health / Seminar room	Lecture room / Practice room
4F	Simulation center	Connecting corridor
3F	Study room / Reading room (Library)	Connecting corridor
2F	Office / Staff meeting room / Lecture room	Connecting corridor
1F	Entrance hall / Clinic / Coffee shop / Machine room	Entrance hall / Study room / Guard station
Building WA		Building WB

Medical Education Simulation Center

On the 4th floor of Building WA and Building WB, one of the largest medical education simulation centers with a site area of over 5,300m² is established. Through several practical simulation educations, students can obtain basic clinical skills effectively. Examples are to train midwifery skill with birth training kit, and educate auscultation skill using heart sound and respiratory sound training kit practically.

International Telemedicine Center

An International Telemedicine Center, connecting with universities and medical institutes overseas, is installed on the 7th floor of the Building WA. Since 2011, IUHW has successfully completed a telepathology and telediagnosis project in China, Vietnam and Myanmar as a part of the international medical alliance project promoted by the Ministry of Economy, Trade and Industry.

The Center for International Research of Infectious Diseases

The Center for International Research of Infectious Diseases is located on the 5th floor of the Building WA, and fortifies a structure for infectious diagnosis and research. Our School of Medicine and a planned university hospital (scheduled to open in 2020) enhance risk management function against emerging infectious diseases in overseas considering their position in Narita, an international gateway city. We foster professionals who are able to manage infection control in the developing countries.

Medical Education Simulation Center

Telepathology and Telediagnosis Project in Vietnam

Active International Exchange

IUHW has signed a collaborative agreement with 41 institutions in 23 countries/regions worldwide. This has enabled IUHW to develop its international activities such as Overseas Clinical Training class which is a compulsory subject in Year 6, as well as exchanging students and faculties for both short-term and long-term.

Conclusion of inter-university agreement with 3 universities in Yangon, Myanmar

Short-term overseas training program students in Vietnam

Discussion with International Students

Q What made you decide to become a doctor?

Kong Borey (Cambodia): I was often ill as a child. I saw how brilliant and great doctors are, and from then on I aspired to become a doctor in the future.

Huynh Ngoc Yen Nhi (Vietnam): I am interested in science, and I want to become someone who can use that scientific knowledge to help lots of people. That is why I admire doctors.

Talgat Tilyeubek (Mongolia): I have liked doctors' white coats since I was a child, so I decided to become a doctor.

May Pyae Kyaw (Myanmar): When I see someone who is ill, I feel that I want to help them. I really enjoy seeing the happy faces of people who have been cured, and that has made my wish to become a doctor stronger.

Ta Ha Nguyen (Vietnam): I want to become a doctor who can save people's lives, and who can improve the quality of life of many people.

Putri Yuliany (Indonesia): When I was asked what I want to be in the future when I was a third-year student, I realized that I wanted to enter a profession that relates to a subject I like, and a profession where I can utilize the knowledge I gained from the subject I like to help people directly. That made me decide to become a doctor.

From the left: Kong Borey, Huynh Ngoc Yen Nhi, Talgat Tilyeubek, May Pyae Kyaw, Ta Ha Nguyen, Putri Yuliany

Q Why did you choose to go to a Japanese medical school?

Kong Borey: Japan is a developed nation, and various fields such as industry, technology, education, and the healthcare system are well-developed. I thought that I would be able to study various things in Japan, and chose a medical school in Japan.

Huynh Ngoc Yen Nhi: Since Japan has high-level healthcare, I thought that if I could enroll in a Japanese medical school, I would be able to experience cutting-edge medical technology of the world. When I heard that there was a scholarship program at IUHW, I aspired for it without hesitation.

Talgat Tilyeubek: I wanted to become a doctor who is useful anywhere in the world. We study medicine in Japanese and English at IUHW. I chose this university thinking that I could become the doctor I am aiming to be by using this great chance.

May Pyae Kyaw: I chose the Japanese medical school because I believe that Japan has a wonderful health insurance system, an excellent education system, a better standard of living, and I believe that I can gain a lot of knowledge here.

Ta Ha Nguyen: Before coming to Japan, I learned from television and textbooks that Japan has a brilliant medical technology and healthcare environment. Hearing that IUHW had spots for international students, I wanted to study here.

Putri Yuliany: Japan is a developed country not only in Asia, but also in the world. I think that Japanese medical research and technology also is in the top class. Having been able to enroll in the Japanese medical school is a great blessing.

Q What is your dream for the future?

Kong Borey: I want to return to my home country and contribute to the development of various fields, particularly medicine in my country.

Huynh Ngoc Yen Nhi: After having studied medicine and gained actual experience, eventually I want to return to my home country and contribute to the development of healthcare in both Vietnam and Japan.

Talgat Tilyeubek: I want to become a doctor who is useful to people. As a doctor, regardless of what kind of doctor I become, I will aim to send patients home with a smile, without ever forgetting that kindness is one of the most important character traits for a doctor.

May Pyae Kyaw: I want to become a bridge in healthcare between Japan and Myanmar. I want to become a doctor who is trusted by Japanese people also.

Ta Ha Nguyen: I want to build a bridge between healthcare in my home country and Japan. I also want to gain experience in many different countries.

Putri Yuliany: I want to become a doctor who can cater to patients' needs, and help them to lead a healthy life. I also want to become a doctor who can promote my home country.

Curriculum of IUHW School of Medicine

The curriculum of IUHW School of Medicine is designed to foster and educate physicians who can serve the international community. Our medical education curriculum exceeds the world standard.

Year 1	Medical professionalism	Communication skills / physical examinations	Medical English / English language	Introduction to medicine / Anatomy	Global health / Overseas medical exposure	Liberal arts
				Medical biology, etc.		
				Basic Biological Sciences		
				Embryology (from fertilization to childbirth)		
				Statistics		
				System-based integrated pathophysiology course		
Year 2		Neonatology, pediatrics, infectious diseases, oncology				
		Human anatomy and Dissection				
		Emergency Medicine and Intensive Care / Anesthesiology, preventive medicine / behavioral science, geriatrics				
		Year 3	Social sciences (Including public health, forensics, and clinical epidemiology)			
			Integrated clinical medicine, introduction to clinical diagnosis, Clinical Reasoning from Chief Complaints			
Common examination (CBT / OSCE (Objective Structured Clinical Examination))						
Year 4	Multiprofessional Teamwork in Healthcare (Lectures and practical training)	Clinical Clerkship				
Year 5						
Year 6	Clinical Clerkship (elective) / Clinical Clerkship (overseas)					
	Post CC OSCE / International clinical skills evaluation test					
	Comprehensive Review					
	Graduation examination					

*The curriculum may be subject to change.

Characteristics of the Curriculum

- All students are required to take 'International Health Course' as one of the required subjects to understand healthcare and medicine overseas, especially in neighbouring Asian countries. Topics covered include global health, tropical medicine and educational systems of international health and medicine.
- Year 6, students will take 'Overseas Clinical Clerkship' as a required subject to learn and experience clinical medicine at medical facilities outside Japan for at least four weeks.
- Students will take Medical English classes and medical interview classes in English so that they will be able to evaluate the patient in English.
- We also offer foreign languages besides English such as Spanish, French, Vietnamese and Korean.
- Students will have access to one of the largest simulation centers in the world, allowing them ample time to practice clinical scenarios and medical procedures using manikins throughout the curriculum.

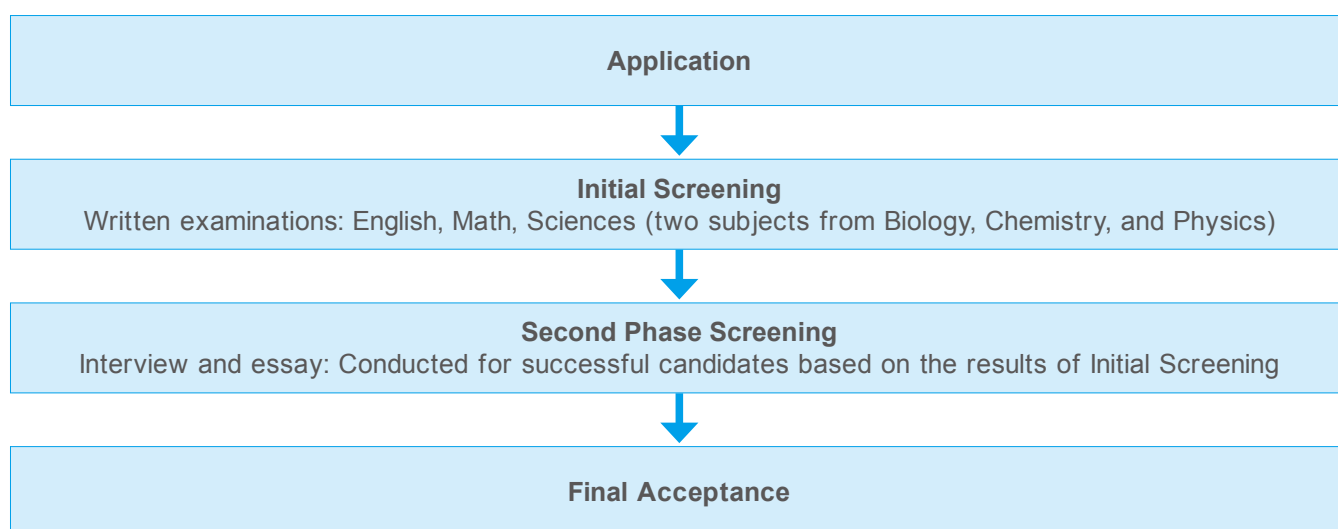

Medical Education in Japan — Basic Information

School of Medicine in Japan

- Japanese undergraduate medical education is six years. High school graduates are eligible to enter medical school.
- Each academic year (school year) begins in April and ends in March.
- An average class size of the Japanese school of medicine is approximately 100.
- There are 82 schools of medicine in Japan, consisting of 51 national (public) universities and 31 private universities.
- Average tuition is approximately ¥33,000,000 (*US\$330,000) for private school of medicine. Additional expenses (textbook, lab coats, stethoscope, etc.) are approximately ¥100,000 (*US\$1,000) per year.
*Tuition for IUHW School of Medicine for six years will be ¥18,500,000 (*US\$185,000) which is the lowest among all of the private medical schools in Japan.

Entrance Examination for School of Medicine in Japan

- Typical Example of Admission Procedure
Typical admission procedure for entering a school of medicine in Japan follows the following steps.

- Eligible candidates are those who have completed 12-year education or equivalent education.
- Entering school of medicine in Japan is very competitive. In academic year of 2017, there were 9,420 capacity for entering school of medicine in Japan, corresponding to less than 1% of 1.2 million 18-year-old population.

National Medical Practitioners Qualifying Examination

- Medical doctors are registered through a licensing system in Japan by passing the national licensing examination conducted in Japanese language.
 - Students, who completed the necessary requirements for graduation are eligible to take the national licensing examination. In order to practice medicine candidates need to pass this national licensing examination.
(In principle, it is essential to graduate from Japanese school of medicine in order to become a physician in Japan.)
- Pass rate for the national licensing examination was 92% (March 2017 figure).
- After successful completion of the school of medicine and registration as medical doctors, graduates are required to undergo two-year mandatory residency training. Their average monthly salary is approximately ¥200,000–400,000. (*US\$2,000–4,000).
**US\$1=¥100 (truncated to integer).

International Student Support

Student dormitory

5-story, all private room dormitory. International students are prioritized but it is also possible for Japanese students to live there. Breakfast and dinner are served at the cafeteria in the dormitory. Well considered for secured environment, such as a security function door at the entrance, and a dormitory manager available at site for 24 hours. WiFi available.

- Room facilities: 216 private rooms with bed, writing desk, wardrobe and air-conditioning equipped
- Common facilities: Cafeteria, Study Room, Meeting Room, WiFi, Parking Lot for cars and bicycles
- Equipment on each floor: Shower Room, Laundry, Kitchenett, Bathroom

Access

- From Narita Campus: 20 minute by bicycle
- From train station: 15 minute walk from Narita Yukawa Station on Narita Sky Access Line

Dormitory Building

Dormitory Room (Example)

Gymnasium at the building of School of Nursing at Narita / School of Health Sciences at Narita

Sports facility

There is a gymnasium at the building of School of Nursing at Narita / School of Health Sciences at Narita, and lawned multipurpose field where students can play futsal or any other activities outside of the school building.

Furthermore playgrounds are scheduled to be equipped at 2 locations; one is 5,659m² space with three tennis courts and running route, the other is around 10,000m² which will possess a 200m track, soccer court and futsal court. One playground will be located at 10 minutes' bicycle ride, and another will be 15 minutes' drive from Narita Campus.

Full-day Excursion with IEC staff

International Exchange Center

An international exchange center, where dedicated staff provides a wide range of vital support for international students, offering continuous assistance for improving Japanese language skills as well as assistance for getting familiarized with Japanese customs and culture.

Japanese Language Program

There is an intensive Japanese language program for international students wishing to improve their Japanese language skills prior to entering the School of Medicine (conditions apply).

Principles and Educational Goals of IUHW

IUHW was founded in 1995 as the first comprehensive university of health and welfare in Japan to advance the social status of specialists in the field of health and welfare. Our goal is to train and educate future leaders in their respective fields, capable of responding to the advancement and specialization of the health and welfare field with good judgment and intelligence. At the same time, we have been strengthening international relations and cooperative activities throughout the globe, especially with emerging countries in Southeast Asia.

3

Fundamental Principles of IUHW

University focused on well-balanced individuals with a solid sense of humanity

University strongly connected to and fully open to the community

University directed towards the attainment of global standard

7

2013	APR	School of Rehabilitation Sciences at Fukuoka renamed to School of Health Sciences at Fukuoka Establishment of Department of Medical Technology and Sciences in School of Health Sciences at Fukuoka Relocation of School of Nursing at Fukuoka to Seaside Momochi area in Sawara, Fukuoka City
2015	JUN	Opening of Japanese Language Program
2016	APR	Establishment of School of Nursing/Health Sciences at Narita Campus
2017	APR	Establishment of School of Medicine
2018	APR	Establishment of School of Psychology and Healthcare Management at Akasaka (Tokyo Akasaka Campus) Establishment of Graduate School of Medicine (Doctoral Program) and Graduate School of Public Health (Master's Program)

University Hospitals and Affiliated Facilities

IUHW group has many medical and welfare facilities including five university hospitals, and Sanno Hospital, which provide various opportunities for clinical training for students to develop their expertise. Students are also able to experience “Team Care Medicine” in clinical practice and study advanced skills with state-of-the-art medical devices.

Tokyo Area

■ IUHW Mita Hospital

JCI-Accredited
Organization

Number of Beds: 291

Accredited as a Joint Commission International (JCI) hospital for patient safety and quality of medical care. Designated as an emergency care hospital and Regional Cancer Hospital in Tokyo.

■ Sanno Hospital / Sanno Birth Center

■ Sanno Medical Center

■ Special Nursing Home for the Elderly / Support Facility for People with Disabilities “Shinjuku Keyaki-en”

Fukuoka Area

■ Takagi Hospital

■ Fukuoka Sanno Hospital

■ Yanagawa Rehabilitation Hospital

■ Yanagawa Institute for Developmental Disabilities

Other Affiliated Facilities

- IUHW Rehabilitation Center (Tochigi)
- Nursing Home for the Elderly “Tochinomi-so” (Tochigi)
- Nursing Home for the Elderly “Ohtawara Kazahana-en” (Tochigi)
- Ohtawara General Home Care Center (Tochigi)
- Group Home Aoyama (Tokyo)
- Mizuma Kohokai Hospital (Fukuoka)
- General Care Center Momochi (Fukuoka)
- Care Support House Okawa (Fukuoka)
- Care Facility for the Elderly “Suigo-en” (Fukuoka)
- Ariake General Care Center (Fukuoka)
- Long-term Care Health Facility (Fukuoka)
- Nursing Home for the Elderly “Komorebi-en” (Fukuoka)

Tochigi Area

■ IUHW Hospital (Main Hospital)

Number of Beds: 353

A foundation hospital serving the northern region of Tochigi Prefecture. Designated as an emergency care hospital and as an emergency pediatric hospital.

■ IUHW Shioya Hospital

Number of Beds: 240

As a regional core hospital which provides from treatment to rehabilitation. Designated as an emergency care hospital and as a Core Cancer Treatment Hospital in Tochigi Prefecture.

■ IUHW Clinic

■ Care Facility for the Elderly "Maronie-en"

■ Nishinasuno General Home Care Center

Chiba Area

■ IUHW Ichikawa Hospital
Number of Beds: 260

In September 2017, "Kaken Hospital" became "IUHW Ichikawa Hospital," an attached hospital to IUHW. In addition to medical treatment, IUHW Ichikawa Hospital will engage in research and education. In conjunction with the establishment of the School of Medicine at Narita Campus in Chiba Prefecture in 2017, IUHW Ichikawa Hospital enhanced its medical staff and departments as an attached organization, supporting treatment in a wide range of fields, notably the orthopedic surgery department, rehabilitation, and the general surgery and digestive surgery departments.

Shizuoka Area

■ IUHW Atami Hospital

Number of Beds: 269

Overlooking the ocean, a foundation hospital serving eastern Shizuoka and western Kanagawa Prefectures. Designated as an emergency care hospital and Regional Cancer Hospital in Shizuoka.

IUHW university hospital will be established near Narita Airport in 2020

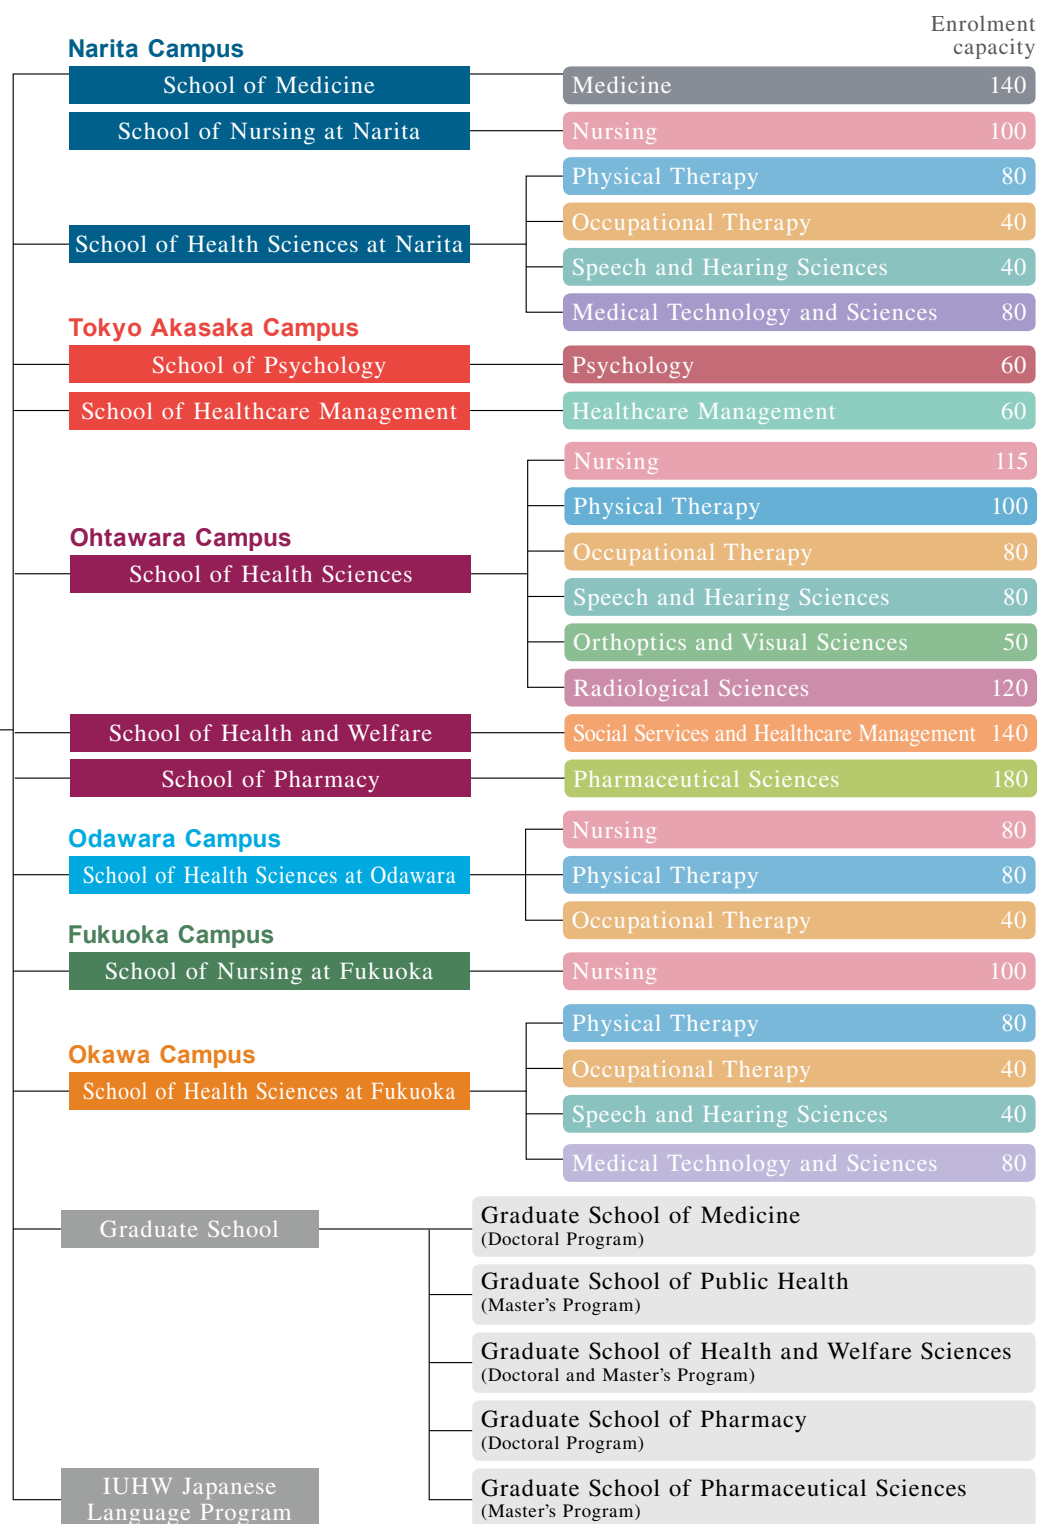

University hospital with international features will be established with 642 beds on 91,000m² architectural area. At the hospital, physicians and medical staff with a good command of foreign languages will be assigned. This will be an international hospital providing multiple language services, religious meals, spaces for religious purposes, excellent facilities, as well as cutting-edge medical services and equipment.

A newest campus opened in Minato-ku, Tokyo in April 2018

(As of March 2017)

Tokyo Akasaka Campus opened in April 2018 on the site of the former Akasaka Elementary School in Minato-ku, Tokyo. Conveniently located and a three-minute walk from Tokyo Metro Akasaka-mitsuke Station, the area is home to various facilities that epitomize central Tokyo, including the National Diet Building, television stations and large-scale commercial complexes. The campus has facilities such as Akasaka Hall, Lifelong Learning Center and International Exchange Center, which can also be used by the local community. IUHW aims to become a hub for the community and for the international exchange and interaction.

School and Departments

School of Psychology and Healthcare Management at Akasaka
 Department of Psychology
 Department of Healthcare Management

Outline of Narita Campus

Conveniently located right in front of Kozunomori Station on the Keisei Main Line enables students to commute from/to Tokyo and neighboring cities. The campus is set in a quiet environment, but has also easy access to commercial facilities, such as shopping malls, restaurants and convenience stores.

Narita City, a home to Japan's main international airport, is located 60km east from Tokyo with a population of approximately 130,000. The city combines rich natural environment with a high degree of internationality.
